

## **Low cost power for PC/104**

Portland, Oregon-January 6, 2007

### **Sensoray Model 209; Low cost power for PC/104**

Sensoray's new PC/104 Power Supply, Model 209, has a wide input voltage range of 8 to 30 VDC. Its three outputs of 5 VDC at 5 amps and  $\pm 12$  VDC at  $\pm 0.5$  amps supply power to the PC/104 and PC/104+ buses. Power output connectors are available for external devices such as video cameras and fans. Input power is via a 3-pin removable terminal block or through a 2 mm circular power jack.

The 209 uses planar magnetics and low ESR caps to achieve low noise and conversion efficiency of over 90%. To survive vehicular applications the 209 has a load dump circuit, a common mode input filter and reverse polarity input protection. The single piece price is \$205. Sensoray 503 684-8005.
