

SENSORAY PRESS RELEASE

FOR IMMEDIATE RELEASE

NEW 3G-SDI Matrix Switch

<http://www.sensoray.com/2444>

Quantity one price just \$1,170!

Model 2444 is a rugged and compact, 4x4 matrix (crosspoint) switch that can simultaneously connect each of its four outputs to any of its four inputs. It supports all single-link SDI standards: SMPTE 259M(C) (SD-SDI), 292M (single-link HD-SDI), and 424M (3G-SDI). Four seven-segment LED displays provide indication of the switch states, as well as signal status of the video inputs.

The unit can be controlled manually through its intuitive front panel console, or with a computer through its Ethernet or serial communications interfaces. A built-in web server allows the unit to be controlled from any web browser, and the unit's integral telnet server enables it to be easily controlled by a remote, automated client.

Features

- Data rates from 125 Mbps to 2.97 Gbps
- Supports SMPTE 259M(C) (SD-SDI), 292M (single-link HD-SDI), and 424M (3G-SDI)
- Automatic reclocking and equalization
- Control via front panel, Ethernet or RS-422/RS-485
- Compact size, low power
