Low Power PC/104+ CPU

Sensoray Company has developed the Model 301, a CPU for embedded and industrial applications. In its basic version, the 301 features low power AMD Elan SC520 133 MHz CPU, 32 MB of SDRAM, an 8 MB flash disk, 1 serial port, a watchdog timer, PC/104+ bus support. The 301 may be upgraded with additional options including Disk-On-Chip, extra 8 MB RAM, second serial port, PC/104 bus support and 10/100Base-T Ethernet adapter. A companion PC/104 board, Model 300TA, is available providing a parallel and 2 serial ports, floppy, IDE, keyboard and mouse interfaces. The 301's unique blend of price, performance, and flexibility makes it a perfect fit for cost sensitive embedded applications requiring a Pentium-class CPU. The Model 301 basic version is available now for \$341 for quantities of 100.
