

PC/104+ MPEG-4 Frame Grabber

Portland, Oregon-September 6, 2006

Sensoray Model 314; MPEG-1/2/4 & MJPEG Frame Grabber

The Sensoray Model 314 frame grabber is Sensoray's latest video acquisition solution. Model 314 is a low-cost MPEG-1/2/4 and MJPEG frame grabber that captures full-frame (720 x 480) video at 30 frames per second. Uncompressed video is available through the PC/104+ bus for previewing. It has two synchronized audio input channels and on screen display of text (OSD). The 314 performs motion detection in three regions of interest, each programmable. Bitrates range from 800kb/second to 10 mb/second. Linux, QNX and Windows drivers are supplied and a Fast Windows stream player is available.

The cost for a single 314 is \$328
