16 x 8 Crosspoint Switch and Frame Grabber

Sensoray Company has developed a combination 16 x 8 crosspoint switch and frame grabber for the PCI bus. Model 609 accepts sixteen composite video inputs and produces eight buffered video outputs with selectable output termination resistors. Four of the selected outputs are connected to a FUSION878 video decoder. The frame grabber section accepts inputs from PAL, SECAM, NTSC and CCIR 601 sources. It decodes full frame NTSC signals at 30 fps. There are sixteen general-purpose digital inputs and sixteen outputs for event monitoring. The 609 is available now for \$350.
