32 Camera Connection Box

Model 609TB accessory box allows connecting cameras, video monitors and digital I/O signals to Sensoray's frame grabbers. It also supplies 12V, 200 mA power for up to 32 cameras. Signal connections between the frame grabber boards and the 609TB are via flat cables. Thirty-two BNC's connect composite video to the frame grabbers. Transorb diodes protect each input from power surges. Eight real-time video outputs are available for display on video monitors. Thirty-two electromechanical relays are available for switching bipolar circuits of up to two amps. Adjacent to each set of supply terminals is a power indicator lamp. The 609TB comes in a standard 19" enclosure with two removable mounting brackets that allow mounting in a standard 19" enclosure or attachment to a vertical or horizontal surface. The model 609TB is available now for \$1,454.00 for quantity one.
